Is malware removal automatic?

rdavis@foregenix.com - 2017-01-24 - Comments (0) - Malware

Our clean ups are **not** done automatically.

When we say a site has malware detected on it, it's because our scanners have found what appears to be malicious code. In order to clean things up, you will need to book a ticket (email support@foregenix.com), and we will help provide assistance with removing the malware from your site.
