

WAF service status

Dimitris Kamenopoulos - 2021-05-05 - Comments (0) - FGX WAF

We are maintaining WAF service status pages per region. The pages are updated automatically by our monitoring tools and retain all event history (for Europe history goes back to March 2019, while for Australia and the USA history goes back to May 2021).

If the current service status is "*availability issues*", rest assured that our team has already been alerted.
