## What should I do if I upgrade the PHP version on my server?

Dario Susman - 2020-01-06 - Comments (0) - Secure Seal

Unless you upgrade to PHP 7.2.x, you won't need to do anything.

However, if you upgrade to PHP 7.2.x you must regenerate the Seal.

For that, please follow this article:

<https://support.foregenix.com/kb/articles/can-the-fgx-web-seal-be-regenerated>

and re-upload the new seal to your server.
