

Do all my devices need to be compliant?

rdavis@foregenix.com - 2018-01-11 - Comments (0) - PCI Compliance

We have multiple devcies in the office. Does every device have to be PCI compliant?

The answer is yes, they will have to be compliant if

1. they access the CDE (Card Data Environment),
2. you deal with PAN etc. directly from those devices or
3. they are on the same network segment as the CDE
