

Headers are showing there may be a leak, how can this be resolved?

rdavis@foregenix.com - 2020-05-14 - Comments (0) - FGX Web Lite

Headers can be removed from all responses from your website. You can configure this yourself or ask your website administrator to do this for you.

You should check with your web developers to confirm they are aware of these exposed headers, in most cases they should be able to remediate these and prevent them from being publicly displayed.
